Subject: RE: [SwindonBathDRC] FW: Feedback for drc 29/9/04

Here is the feedback from the DRC 29/9/04.

Jeremy.

Feedback for DRC 29th September 2004.

Only Michael's group completed feedback forms this week.

What went well today and why?

The back pain and sports medicine talks were highly commended.

Sports medicine – more please.

Ankle examination was helpful.

Practical approaches helpful.

Soapbox - excellent

Paper pertinent.

Chance to discuss other issues in the afternoon helpful.

What did not go well and why?

Some felt group discussion of the scenario wasted time.

Knee problems or more time on back pain management would have been better.

Scores:

Morning scored 4-5

Afternoon scored 4-5

Things that will improve our practice:

Improved ankle examination

Basic management of some sports injuries

Handout on back exercises and ankle exercise suggestions.

Advice from physio – early referral for acute back, more active mobilization

Use positive attitude and don't allow adoption of sick role in back pain management

What we would like to learn more about:

Sports medicine/injuries

Musculoskeletal assessment

Knee injuries

Can we have the same physio back to do a shoulder lecture?

??? Bio-terrorism.
